

TSD Team Celebration

Thursday, May 14, 2026 · 4:00–6:00 PM · In-person + 2 remote · Beer, wine & tacos

AGENDA

Arrive & Settle 4:00–4:20

- Food out, drinks flowing — let people find each other
- No formal program yet

The Program 4:20–5:20

Open 10 min

Rick

- Welcome — acknowledge remote attendees by name
- Brief acknowledgment of the ERP sale: it happened, it's done, it was the right call
- Pivot fast: "What that means for us is simple — everything we have goes into this division now. That's what today is about."
- Set the tone: more focused, better resourced, moving fast — and celebrating that

Where We're Going 10 min

Rick

- MSP + security, full stop — every dollar, decision, and person pointed at one mission
- The team in this room is the team that's going to build it
- Tee up the showcase: "Let me show you what's already in motion"

AI Showcase: What We're Building 30 min

Rick as MC — 5–7 min per presenter

Vince — Proposal Engine & Account Management

"Vince is rebuilding how we price and create our proposals, and automating administrative work in Account Management. Vince —"

- Rebuilding the proposal engine from scratch — faster, easier to customize, professional output every time
- Automating account management admin so focus stays on clients
- Going forward: quotes out faster, reporting more consistent, less manual overhead

Ryan — Helpdesk Automation

"Ryan is transforming how the helpdesk operates. Ryan —"

- AI-assisted responses — techs move faster on every ticket
- More tickets closed per person, faster resolution times

- Future goal: common issues resolved automatically
- Future goal: automated triage and routing — right person, right ticket, faster

Erik — Maturity Model Presentations

"Erik is streamlining one of our most important client deliverables. Erik —"

- Rebuilding how we produce maturity model presentations using AI
- Faster to generate, more consistent, easier to tailor per client
- Going forward: better presentations delivered in less time

Aaron — Engineer Performance & Ticket Analysis

"Aaron is using data to sharpen how we look at individual and team performance. Aaron —"

- Using AI to analyze ticket data at the individual engineer level — what's working, where there are gaps
- Identifying patterns and trends that don't surface in manual review
- Going forward: performance insights that help the team improve and help us manage better

"This is why I'm excited. This isn't a roadmap slide. This is already happening — inside this team."

Toast **5 min**

Rick — look at the camera for remote attendees when you raise your glass

Open Time — 5:20–6:00

40 min of tacos, drinks, and team time. No agenda.

Give remote attendees a graceful exit after the toast — "Thanks for making this work from out of town."

TOAST

"I'll keep this short.

We made a big decision this year. You're looking at the result — one company, one focus, a lot of momentum.

What you just heard from Vince, Ryan, Erik, and Aaron isn't a roadmap. It's already happening.

Before I let you get back to the tacos — I want to call out Cody and Josh specifically, and everyone who worked with Cooper Elliott. That work mattered. Thank you.

Raise a glass. To this team."

PRE-MEETING ACTION ITEMS

- Brief Vince: proposal engine rebuild + account management automation
 - Brief Ryan: triage, auto-resolution, and AI-assisted responses
 - Brief Erik: streamlining maturity model presentations
 - Brief Aaron: individual engineer performance + ticket analysis
 - Send remote attendees a DoorDash/GrubHub gift card before 4pm
 - Designate someone to own the camera and mic during the program
 - Confirm: no TSD headcount impact from the ERP sale (be ready to say this clearly)
-
